

To Whom it may concern:

I just found out about the National Association of Broadcasters (NAB) efforts to restrict XM Radio's efforts to provide local traffic and weather. It is my understanding that petition 04-160 is the document submitted by the NAB. Please reject this petition, as XM has completely replaced my reliance on "traditional" radio, and the one area lacking in my city (B'ham, AL) is local weather and traffic. I understand that XM is working on providing this to all areas, and it would be a disgrace for the NAB to prohibit XM from providing this service.

Thank you for your consideration!

Robert McClellan
